

54

The participating area herein established shall be revised from time to time subject to the approval of the Director whenever such action appears appropriate as a result of further drilling operations or otherwise, to include additional land then regarded as reasonably proved to be productive in paying quantities. The effective date of any revision shall be the first of the month in which is obtained the knowledge and information on which such revision is predicated, provided however, that a more appropriate effective date may be used if justified by the unit operator and approved by the Director. No land shall be excluded from a participating area on account of depletion of unitized substances.

It is the intent of this section that a participating area shall represent the area known or reasonably estimated to be productive in paying quantities; but, regardless of any revision of the participating area, nothing herein contained shall be construed as requiring any retroactive adjustment for production obtained prior to the effective date of the revision of the participating area.

In any revision of Exhibit "C" due to an expansion of the participating area, the committed lands brought into the participating area shall be given a participation proportional to that which the acreage to be included bears to the total committed acreage of the participating area, after inclusion of the acreage to be brought in as a result of the then current revision. However, the respective tract participations of the tracts or portions of tracts which were included in the participating area prior to such revision shall remain in the same ratio one to another.

In any revision of Exhibit "C" pursuant to Section 2 (unit area) Section 32 (Loss of Title) or Section 33 (non-joinder and subsequent joinder) the revised percentage participations of the respective tracts which were committed hereto prior to such revision shall remain in the same ratio one to another.
