

(3) A plan for the reclamation of all areas disturbed by exploration or mining activities, including provisions for segregation and storage of topsoil, the contours of the site before and after exploration or mining activities, the types of grasses or other vegetation proposed and any other information regarding the manner by which the applicant proposes to reclaim the site.

b. Any mining activity shall be designed and carried out in conformity with the following standards:

(1) Pollution of ground water and watercourses shall be minimized;

(2) Erosion into watercourses or onto adjacent properties shall be prevented or minimized;

(3) Any poisonous or hazardous materials shall be treated or otherwise disposed of so that no risk of damage to persons, property or wildlife shall result;

(4) Sites shall be adequately fenced to prevent unreasonable risk of harm to persons or wildlife or livestock;

(5) The operation shall be planned and carried out in a manner that minimizes the adverse impacts on adjacent uses;

(6) The site shall be reclaimed after exploration or mining to a condition and use commensurate with the condition and use of the property prior to such activity;

(7) The operation shall be designed to prevent the destruction or subsidence of adjacent properties.

c. A bond or other financial guaranty acceptable to the county shall be provided by the applicant, to assure that the permit is complied with and the site reclaimed. The county may accept the bond required by any state or federal agency, or may require additional financial assurance.

d. The county may accept the permit issued by the Wyoming Department of Environmental Quality or a federal agency of evidence of compliance with the requirements of this section.
