DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

Washington, D. C. December, 5, 1918.

This certifies that the tracts of land described in the foregoing list have been carefully examined and compared with the township plats and tract books in this office and the same have been found to inure to the State of Wyoming under its grant for the purpose stated, being free from conflicts or other adverse claims of record. It is not disclosed by the records of this office that any of the selected lands are included in any withdrawal for oil, coal, or other minerals, or for power-site or reservoir purposes. Field examination of a portion of the selected lands has been made by the special agent of this office, and a non-mineral classification thereof recommended. This recommendation has been concurred in by the Director of the U. S. Geological Survey who reported that all of the selected lands are non-mineral in character, and that none of such lands are valuable for power site or reservoir purposes.

It is hereby certified that the tracts described in this list, No. 14, are embraced in the original lists, now on file in this office, of lands selected by the State of Wyoming, pursuant to the laws of said State, in the Douglas Land District, as indemnity for losses in the sections and townships named, which school-land indemnity selections are authorized by the acts of Congress cited.

It is further certified that the lands reported lost or deficient in said list, and those selected in lieu thereof have been examined and compared with the township plats and tract books in this office; that the indemnity lands claimed have been found to be properly due the townships for which they were selected, and the selected lands are shown to be subject to such selection, being surveyed public lands, not mineral in character, within the limits of said State, and free from adverse claims of record.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

Washington, D. C., March 3, 1910.

This certifies that the tracts of land described in the foregoing list have been carefully examined and compared with the township plats and tract books in this office, and the same have been found to inure to the State of Wyoming under its grant for the purposes stated, being free from conflicts or other adverse claims of record; that these selections have been tested by maps furnished by the Geological Survey, indicating the coal areas in said State. Some selections are indicated as lying within coal areas, but these have been clear listed by the Field Service, after personal examination, and approved by the Geological Survey.

The remaining selections are not within townships indicated as containing known or reported coal deposits. The selected lands were not returned, on survey, as mineral in character and are not in conflict with mining claims of record in this office.

Earl D. Stocking, Examiner.

Approved: G. B. Driesbook
Chief of Division G.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE,

Washington D. C. March 3, 1910.

It is hereby certified that the tracts described in this list, No. 12, are embraced in the original lists, now on file in this office, of lands selected by the State of Wyoming pursuant to the laws of said State, in the Douglas land district, as indemnity for losses in the sections and townships named, which school land indemnity selections are authorized by the acts of Congress cited.

It is further certified that the lands reported lost or deficient in said list and those selected in lieu thereof have been examined and compared with the township plats and tract books in this office; that the indemnity lands claimed have been found to be properly due the townships for which they were selected, and the selected lands are shown to be subject to such selection, being surveyed public lands, not mineral in character, within the limits of said state, and free from adverse claims of record.

It is, therefore, recommended that thesaid list, embracing 5,043.37 acres, be approved, subject to any valid interfering rights existing at date of selection.

GENERAL LAND OFFICE

Washington, D. C. April 8, 1909.

This certifies that the tracts of land described in the foregoing list have been carefully examined and compared with the township plats and tract books in this office, and the same have been found to inure to the State of Wyoming under its grant for the purpose state, being free from conflict nor other adverse claims of record; that these selections have been tested by maps furnished by the Geological Survey, indicating the coal areas in said State and are not within townships indicated thereon as containing known or reported coal deposits, except certain tracts since examined and reported non-coal by special agents from this office; that the selected tracts were not returned on survey as mineral in character; that most of the tracts have been published under the mining regulations, without protest or objection, and that the remaining tracts are not in townships containing mining claims of record in this office.

DEPARTMENT OF THE INTERIOR
GENERAL LAND OFFICE

Washington, D. C. January 27, 1909.

This certifies that the tracts of land described in the foregoing list have been carefully examined and compared with the township plats and tract books in this office, and the same have been found to inure to the State of Wyoming under its grant for the purpose stated, being free from conflicts or other adverse claims of record; that these selections have been tested by maps furnished by the Geological Survey, indicating the coal areas in said State and are not within townships indicated thereon as containing known or reported coal deposits, except certain tracts classified as coal at the minimum price, but since examined and reported non-coal by a Special Agent from this office; that the selected tracts were not returned on survey as mineral in character; that most of the tracts have been published under the mining regulations, without protest or objection and that the remaining tracts are not in townships containing mining claims of record in this office.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE,

Washington, D. C. December 1, 1908.

This certifies that the tracts of land described in the foregoing list Have been carefully examined and compared with the township plats and tract books in this office, and the same have been found to inure to the State of Wyoming under its grant for the purpose stated, being ffee from conflicts or other adverse claims of record.

The selections have been tested by the maps furnished by the Geological Survey, indicating coal areas and are not within townships marked thereon as containing coal deposits, except certain tracts which have been reported by a special agent as non-coal. The selected tracts were not returned, on survey, as mineral although some of the tracts lie in mineral townships. Most of the tracts have been published under the regulations governing such selections without protest or objection.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE.

Washington, D. C. November, 11, 1918.

This certifies that the tracts of land described in the foregoing list have been carefully examined and compared with the township plats and tract books in this office, and the same have been found to inure to the State of Wyoming, under its grant for the purpose stated, being free from conflicts or other adverse claims of record. All of the selected lands have been withdrawn as coal lands and are still so withdrawn.

Some of the tracts have been classified as coal lands at a stated price per acre. As indicated in the list, a portion of the tracts were withdrawn after the date of the filing of the application of the State to select same. In these cases the State has elected to take title to the selected lands exclusive of the coal deposits therein as provided in the Act of March 3, 1909 (35 Stat. 844). As to the remaining tracts which were withdrawn prior to date of selection, the State has consented to take little with reservation to the United States of all coal thereinunder the Act of June 22, 1910 (36 Stat. 583) as supplemented by the Act of April 30, 1918 (37 Stat. 105). The selected lands are not embraced in the withdrawal for power site or reservoir purposes. Reports have been received from the direction of the U. S.Geological Survey indicating that said selected lands contain no valuable deposits of minerals, other than coal, and that they have no valuable power site or reservoir possibilities.

Geo. A. Jolliffe,

Examiner.

APPROVED:

G. B. Driesbook
Chief Division "G"

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE,

Washington, D. C. November 27, 1918.

It is hereby certified that the tracts of land described in this list, No. 25, are embraced in the original lists, now on file in this office, of lands selected by the State of Wyoming pursuant to the laws of said State, in the Buffalo, Cheyenne, Douglas, Evanston, Lander and Sundance Land District, as indemnity for losses in thesections and townships named, which school land indemnity selections are authorized by the Acts of Congress cited.

It is further certified that the lands reported lost or deficient in said list and those selected in lieu thereof have been examined and compared with the township plats and tract books in this office; that the indemnity lands claimed have been found to be properly due the townships for which they were selected, and the selected lands are shown to be subject to such selection, being surveyed public lands, within the limits of said State free, from adverse claims of record. All of the selected lands have been withdrawn as coal lands and are still so withdrawn. Some of the tracts have been classified as coal lands at a stated price per acre.

As shown in this list, a part of the selections, by reason of the lands covered thereby having been withdrawn after date of selection, are governed by the Act of March 3, 1909 (35 Stat. 844). In these cases the State has elected to take title to same with reservations to the United States of all coal therein under the above act. The remaining selections come under theAct of June 22, 1910 (36 Stat. 583) as supplemented by the Act of April 30, 1918 (37 Stat. 105). As to these lands the State has consented

to take title to same under said Act of June 22, 1910.

It is, therefore, recommended that thesaid list, embracing 1511.35 acres, be approved subject to any valid interfering rights existing at date of selection, but excepting and reserving unto the United States all coal in the selected lands, and to it, or persons authorized by it, the right to prospect for, mine, and remove coal from same, upon compliance with the conditions and subject to the provisions and limitations of said Act of March 3, 1909, as to the lands coming thereunder, and of said Act of June 22, 1910, as supplemented by the Act or April 30, 1912, as to the remainder and excepting and reserving unto the United States rights of way, over and across the said selected lands for ditches or canals constructed by the authority, all as directed and required by the Act of Congress, Approved August 30, 1890 (26 Stat. 391).

GENERAL LAND OFFICE

Washington, D. C. January 2, 1919.

This certifies that the tracts of land described inthe foregoing list have been carefully examined and compared with the township plats and tract books in this office, and the same have been found to inure to the State of Wyoming under its grant for the purpose stated, being free from conflicts or other adverse claims of record. It is not disclosed by the records of this office that any of the selected lands are included in t any withdrawal for oil, coal or other minerals, or for power site or reservoir purposes. Reports have been received from the Director of the U. S. Geological Survey stating that the records of the Survey indicate that the selected tracts are without value for oil, coal or other minerals, and that they have no power site or reservoir possibilities.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

Washington, D. C., January 13, 1919.

This certifies that the tracts of land described in the foregoing list have been carefully examined and compared with the township plats and tract books in this office and the same have been found to inure to the State of Wyoming, under its grant for the purpose stated, being free from conflicts or other adverse claims of record. The lands selected in lists 014690 and 019654, Cheyenne series 02160 Evanston series, and 05196 and 07098, Lander series having been withdrawn as coal lands and are still so withdrawn. Some of said lands have been classified as coal lands at the minimum price. Lots 5 and 6 Sec. 31, T. 14, N., R. 89 W., having been withdrawn after the date of filing of the State's application to select same, the selection thereof is governed by the Act of MARCH 3, 1909 (35 Stat., 844) in this case the State has elected to take title to the lands exclusive of the coal deposits therein under said Act. The lands covered by the remainder of the above selections were withdrawn for coal prior to date of selection. In these cases the State has consented to take title with reservations to the United States of all coal therein under the Act of June 22, 1910 (36 Stat., 583), as supplemented by the Act of April 30, 1918 (37 Stat. 105) except as to the selections in List 014690/ In matter of these selections,which are of the class referred to in the proviso of Section 1 of the Act of June 22, 1910 supra , the record shows that the State has been notified under paragraph 3(b), Circular of September 8, 1910, on Form 4-358, wherein it is provided that in default of action by claimant within thirty days from notice, limited patent provided for in the Act Shall issue. In these cases the district land officers have reported no action taken by the State after due service of notice, evidence of which is furnished. The lands selected in lists 317, 07930, Douglas series and 07098, Lander series, have been withdrawn and reserved for petroleum and these selected in lists 04422 and 05348, Lander Series, have been included in phosphate reserves. In all of these cases the State has filed waivers of all its rights in and to the oil and gas, or phosphate deposits in the lands, as the case may be, with the state ment that the selections are made subject to the provisions of the Act of July 17, 1914 (38 Stat. 509). The selected lands are not embraced in any withdrawal for powersite or reservoir purposes. The director of the U. S. Geological Survey has reported that the records of the Survey indicate that said selected lands contain no valuable deposits of minerals, other than coal, petroleum, or phosphate, as the case may be, and that the selected lands have no valuable power site or reservoir possibilities.

The lands reserved, for petroleum or for phosphate, are governed by the Act of July 17, 1914, (38 Stat., 509) In these cases the State has waived all its right in and to the oil and gas or phosphate deposits in the tracts of land aforesaid, and has filed its request that these selections be made subject tothe provisions of the Act of July 17, 1914, aforesaid.

It is therefore recommended that said list, embracing 961.07 acres, be approved subject to any valid interfering rights existing at date of selection, excepting and reserving however, to the United States all the coal, oil and gas, or phosphate deposits in the lands, as the case may be, and to the United States, or persons authorized by the United States, the right to prospect for, mine, and remove the coal oil and gas, or phosphate deposits from the same upon compliance with rhe conditions and subject to the provisions and limitations of the Acts of Congress approved March 3, 1909 (35 Stat. 844) June 22, 1910 (36 Stat. 583) and July 17, 1914 (38 Stat. 509), as thecase may be, and excepting and reserving unto the United States rights of way, over and across the said selected lands for ditches or canals constructed by its authority, all as directed and required by the Act of Congress approved August 30, 1890 (26 Stat. 391).
